

CARRY CASES

The 300 series of carry cases has a modern design and offers reliable protection for your valuable equipment and accessories. They are available in 4 sizes. The choice is yours: carry cases empty or as sets with optional components for the individual partitioning of the interior according to your own requirements.

- The carry cases consist of coated thermoformed shells for a high-quality look and feel
- Robust and durable yet light in weight, they offer easy and comfortable handling
- They can be flexibly adapted: movable and upholstered partitions with Velcro fastening for practical divisions, standardised foam inserts with a grid for individual customisation, optional Velcro pouches in a modular assembly system for easy fixing to put the interior of the cases in order
- Integrated drawer compartments are ideal for operating instructions, documents and the like - everything has its place and is safely stored
- The carry cases can be fitted with logos or nameplates for your company branding (business card compartment, logo window, zipper)
