Miniature 'SOAP' Enclosures from TEKO

TEKO's 'SOAP' enclosures have been designed for housing miniature and small hand-held electronic devices. These modern and attractive cases have rounded corners for comfortable holding. Typical applications will include pocket remotes, interfaces, security and measuring devices, personal medical monitors, cable nodes and much more.

The 'SOAP' enclosures consist of two identical top/base parts which snap-together with secure locking clips. For security, the cases can only be opened by inserting a small flat screwdriver into the locking clips.

'SOAP' enclosures are molded high-impact ABS (UL 94 HB), and are offered in three standard colors: black, gray and white. An extensive range of ten standard models is offered with sizes from 2.20" x 1.22" x 0.94" to 5.16" x 2.56" x 0.96".

PCBs and other electronic components can be easily located within the 'SOAP' enclosures. Two models are also offered with connector apertures pre-molded in one or both of the ends.

TEKO can supply the 'SOAP' enclosures with additional holes for push-buttons, connectors and displays etc., plus silk-screen printed legends and logos, and RFI/EMI shielding. The cases can also be molded or painted in alternative colors.

Standard prices start at \$2.

More information on these enclosures can be found on TEKOs website at:
