

## News Release

Release No: T2006.11

### Multipurpose, Low Cost 'COFFER' Enclosures from TEKO

TEKO offer their 'COFFER' enclosures in an extensive range of sizes and versions. These low cost multipurpose enclosures have been designed for fast assembly of electronics and electrical components. Typical applications will include measurement devices, prototype systems, RF equipment, switch boxes, security electronics etc.

The 'COFFER' enclosures are molded in ABS (UL 94 HB) in two standard colors: black or light gray. Eight sizes are offered with external dimensions from 3.94" x 2.16" x 1.14" to 8.46" x 5.12" x 2.70". Internal guide rails are also provided for mounting PCBs and component assemblies.

The standard 'COFFER' models are supplied with a molded ABS lid. 'COFFER A' models are supplied with a flat aluminum top panel, which can be fitted with a membrane keypad or product label. 'COFFER TP' models are supplied with both an aluminum top panel and a clear polycarbonate lid. The lids and panels are fitted by four self-tapping screws supplied.

TEKO can supply the 'COFFER' enclosures with additional holes for push-buttons, connectors and displays etc., plus silk-screen printed legends and logos, and RFI/EMI shielding. The cases can also be molded or painted in alternative colors. Standard prices start at \$5.

More information on these enclosures can be found on TEKOs website at:
