New Pocket Size 'MINITEKNET' Enclosures from TEKO

TEKO have launched their new 'MINITEKNET' plastic enclosures. These compact and ergonomic hand-held cases have been designed for the latest pocket size electronics. Typical applications will include RF and infra-red remote control units, medical and wellness equipment, detection devices, measurement systems, and personal security equipment etc.

These unique ergonomic enclosures feature 'soft-touch' edge grips for secure and comfortable holding during use. The edge grips also provide protection for the case moldings. The standard case material is off-white, or black, ABS (UL 94 HB) with a modern textured finish. The edge grips are in contrasting light gray or dark gray elastomer, which can also be molded in other colors.

'MINITEKNET' cases consist of three parts, the top and base moldings and a clip-on battery compartment lid. The integral battery compartment will accept two 1.5V AA cells or a 9V cell. The cases are assembled by four self-tapping screws. Internal PCB screw pillars are provided in the top and base parts.

The external dimensions are 4.53" x 2.75" x 0.94". All models feature a recessed top molding for easy location of a membrane keypad, display module or product label. Prices start at \$29.

TEKO can supply the 'MINITEKNET' enclosures with additional holes for push-buttons, connectors and controls etc., plus silk-screen printed legends and logos. The cases can also be molded or painted in alternative colors.

More information on these enclosures can be found on TEKO's website at:
