Extended Range of 'TEKNET-B2' ABS Enclosures

Due to customer demand, TEKO have extended their popular range of 'TEKNET' ABS enclosures with the new 'B2' models which have larger battery compartments. Typical applications include in-field test and measurement instruments, medical devices, data loggers and much more.

The ergonomic 'TEKNET-B2' hand-held enclosures feature 'soft-touch' edge grips for secure and comfortable holding during use. The edge grips also provide protection for the case moldings. The standard case material is off-white or black ABS (UL 94 HB) with a modern textured finish. The edge grips are in contrasting light gray or dark gray elastomer, but these can also be molded in other colors.

The four new models have external dimensions of 6.10" x 3.78" x 0.94" or 6.10" x 3.78" x 1.10" and feature larger battery compartments which will accept four 1.5V AA cells or two 9V cells.

The top and base moldings include screw pillars for fitting PCBs and assemblies. All models feature a recessed top molding for easy location of a membrane keypad, display module or product label. Assembly is by four self-tapping screws. Prices for the new models start at \$29.

TEKO can supply the 'TEKNET-B2' enclosures with additional holes for push-buttons, connectors and controls etc., plus silk-screen printed legends and logos. The cases can also be molded or painted in alternative colors.

More information on these enclosures can be found on TEKO's website at:
